

## CASE STUDY 2

### A GAMING COMPANY WHO COULDN'T AFFORD TO GAMBLE ::

Betfair is a registered bookmaker in the UK and operates an online betting exchange. Processing more than 5 million transactions a day and more than 300 bets a second through more than 350,000 registered users they have one of the most resilient betting platforms available on the Internet today.

**BRIEF ::** Work in collaboration with internal groups to design and build a new DR data centre that would pass IPO audit requirements first time.

**DESIGN ::** 4-Tier Collapsed Backbone using Foundry Big Iron Switches, Big IP Load Balancers, and Sun Microsystems FEP's with back-end Hitachi SAN's to run the Oracle databases and applications.

**BUILD ::** All infrastructure was built and tested at our Goswell Road facility, and then migrated to Global Switch 2 over a 3 day time-frame.

**RESULT ::** Good to go. With a proven DR plan, Betfair's auditors gave their approval to proceed with an IPO.

---

“Gube continually astounded us with their expertise and experience, bringing the project ahead of schedule by 3 months, and well within budget. Gube are simply outstanding”. **Betfair The Worlds largest online betting exchange**
